File System

Using Terminals (Command line interface)

- PWD (Print Work Directory)

Displays current directory you're working on

- CD (Change Directory)

Ex. `cd folder_name`, `cd ..`

- LS (List)

List all files and folders within this directory

Ex. `ls`, `ls -l`, `ls -a`, `ls -la`

Continued...

- CP (Copy File)

Ex. `cp original_file new_file`

- MV (Rename File)

Ex. `mv original_file new_file_name`

- RM (Delete File)

Ex. `rm filename, rm *.txt`

- RMDIR (Delete Directory)

Ex. `rmdir folder_name`

Continued...

- Atom filename

Create new file with filename, or open a existing file named filename.

- Start filename

Starts the file with filename.
